PROFILE SUMMARY

Senior HSE & FLS professional with 21 years of uninterrupted, accident-free operations across Oil Refinery, Petrochemicals, Mega Construction, Facility Management, Infrastructure, Heritage Development, and Telecommunications sectors. Dual specialisation in Health, Safety & Environment Management and Fire & Life Safety (FLS) systems. Consistent delivery of zero LTI outcomes across high-risk, multi-site, and multi-stakeholder environments in Saudi Arabia, Gulf region, and internationally. Proven crisis management capability including COVID-19 pandemic compliance during live mega-project construction. Vendor-approved by Saudi Aramco, SABIC, SADARA, and SASREF.

CAREER HIGHLIGHTS

21 Years Uninterrupted Experience	Zero LTI Zero Fatalities on Record	11 Projects Across 5 Sectors	\$25B+ Portfolio Projects Managed
---	--	--	---

CORE COMPETENCIES

HSE MANAGEMENT

- ▶ HSE Management Systems — ISO 45001 / OHSAS 18001
- ▶ Risk Assessment, HAZOP & JHA Analysis
- ▶ Incident Investigation & Root Cause Analysis
- ▶ Permit to Work (PTW) System Administration
- ▶ Emergency Response Planning & Execution
- ▶ Contractor & Subcontractor HSE Oversight
- ▶ Regulatory Compliance — Saudi, GCC & International
- ▶ Pandemic / COVID-19 Emergency Protocols

FIRE & LIFE SAFETY / SPECIALIST

- ▶ Fire & Life Safety (FLS) Systems Management
- ▶ Civil Defense Coordination & Compliance
- ▶ Firefighting Infrastructure & Operations
- ▶ Emergency Services Control Centre (ESCC)
- ▶ Behavioural Based Safety (BBS) Programmes
- ▶ HSE Training, Coaching & Workforce Induction
- ▶ PMC / PMO HSE Programme Oversight
- ▶ GIGA & Multi-Site Mega-Project Management

PROFESSIONAL EXPERIENCE

Project HSE & FLS Manager

Thabthabat | Ministry of Interior — MIFON Last Mile Project | Royal Commission AlUla, KSA

July 2024 – Present

Providing integrated HSE & FLS management for Ministry of Interior national security telecommunications last-mile infrastructure across 7 active construction sites in AlUla, KSA.

- Developed the first structured HSE documentation framework for Ministry of Interior national security infrastructure — formally adopted across all 7 active project sites
- Established site-specific emergency response plans, PTW systems, and HSE induction protocols for a multi-contractor remote-access programme
- Maintained zero LTI record across all ongoing civil, mechanical, and cable installation works in a security-sensitive operational environment

HSE & FLS Manager (PMO)

Serco — Osool Real Estate | Digital City Riyadh — GOSI Real Estate Portfolio | Riyadh, KSA

July 2022 – June 2024

PMO-level HSE & FLS oversight for a 30-building GOSI mixed-use real estate campus in Riyadh, spanning construction completion, fit-out, and facility management transition phases.

- Established the Centralised Emergency Services Control Centre (ESCC) from inception — first integrated emergency hub on Digital City campus, covering all 30 buildings
- Unified independent tenant FLS systems across 30 buildings into a single management framework, resolving critical life-safety coordination gaps
- Successfully executed multi-building live evacuation drills across 4 occupied 21-floor towers with up to 6,000 live occupants — zero incidents
- Achieved 100% NCR closeout rate across all contractor activities throughout the PMO engagement

Project HSE Manager

Meinhardt Group — Tatweer Building Company (TBC) | RCU AlUla Heritage Construction — Al-Faris International School | AlUla, KSA

July 2021 – June 2022

HSE management for UNESCO-aligned heritage construction under the Royal Commission for AlUla, overseeing multi-nationality workforce operations on a flagship education infrastructure project.

- Delivered structured workforce HSE training programmes with measurable improvement in safety awareness across multi-nationality heritage construction teams
- Established a proactive hazard identification programme tailored to heritage-sensitive construction — zero incidents recorded throughout the project lifecycle

Project HSE Manager (PMC)

Arabtec Jardaneh — Parsons PMC | Saudi Aramco East-West Pipeline Residential Compound | KSA

January 2020 – June 2021

PMC-assigned HSE management for Saudi Aramco East-West Pipeline residential compound development — 6 simultaneous live construction sites involving heavy civil, lifting, and excavation operations.

- Achieved zero major incidents across all critical operations — lifting, deep excavation, and heavy machinery — across 6 concurrent active construction sites
- Implemented multi-site contractor safety integration via Procore digital platform, enabling real-time compliance tracking and live incident reporting across all sites

HSE Manager

Saudi Baytur — Parsons PMC | KAHD Parcel 2 Mixed-Use Development | Riyadh, KSA

December 2019 – December 2020

HSE management for King Abdullah Financial District (KAHD) Parcel 2 development under Parsons PMC oversight — executed through the national COVID-19 pandemic emergency period.

- Delivered on-time project completion with zero NCRs and 100% observation closeouts during active national pandemic emergency conditions
- Managed COVID-19 protocols across the full project workforce — zero fatalities, 100% quarantine compliance maintained throughout
- Ensured safe execution of all high-risk operations (work at height, lifting, confined spaces, hot work, heavy machinery) with zero recordable incidents

HSE Coordinator — Industrial Shutdowns

Various Clients | SASREF + SABIC + SADARA Concurrent Shutdowns | Eastern Province, KSA

May 2019 – November 2019

Specialist HSE coordination across three simultaneous turnaround shutdowns at world-class petrochemical facilities — covering phosgene, isocyanate, and critical-life zone operations with 300+ personnel.

- Maintained zero fatalities across phosgene, isocyanate, and critical-life zone operations — emergency escape mouth-bits and phosgene badge protocols enforced across 300+ personnel at 3 concurrent facilities
- All 3 shutdowns completed on time within accelerated 24-hour, 7-day schedules without HSE non-conformances

HSE Manager

IVRCL Infrastructure & Projects / ABV Rock | Saudi Border Security Development Project | Ardah, KSA

November 2017 – March 2019

HSE management for a restricted-access Saudi government border security infrastructure programme in a remote military zone — multi-site construction with heightened security clearance requirements.

- Designed and implemented the HSE scoreboard and safety performance tracking system from zero — the first structured HSE measurement framework on this government programme
- Delivered full emergency response drill programme and workforce HSE induction in a remote, access-restricted military environment

Aramco HSE & Firefighting Specialist

Arabtec Construction LLC | Saudi Aramco EDRC Package 5 — 380-Villa Residential Compound | Dhahran, KSA

November 2016 – November 2017

HSE and firefighting specialist on Saudi Aramco's EDRC Package 5 residential compound project (380 villas), operating under full Saudi Aramco SAEP/SAES compliance requirements.

- Delivered comprehensive firefighting, emergency response, and behavioural safety training programmes across the full workforce
- Implemented periodic emergency evacuation drills and fire prevention programmes in accordance with Saudi Aramco standards
- Maintained Saudi Aramco vendor approval (ATS-2481) in good standing throughout the engagement

Fire and Safety Manager

Al-Abbas Group of Companies | Extension & Standardization Project | Pakistan (3 Sites: Fabrics, Garments, Onshore Ship Breaking)

August 2013 – November 2016

Group-level HSE, fire safety, and social accountability management across 3 industrial sites — driving international compliance for an export-oriented manufacturing group.

- Acquired and maintained ISO 9001 Quality Management and SA 8000 Social Accountability certifications across all 3 sites
- Fully upgraded fire protection infrastructure across all Al-Abbas industrial sites to international export market compliance standards
- Delivered emergency management and fire safety frameworks meeting international buyer audit requirements

HSE Coordinator

Dawlance Private Limited | Manufacturing — Home Appliances & Electronics | Pakistan

April 2011 – July 2013

HSE coordination across Pakistan's largest home appliance manufacturer — ISO 9001 and ISO 14001 certified multi-facility manufacturing operations.

- Established and maintained the fire safety management system across ISO 9001 / ISO 14001 certified manufacturing facilities
- Fully implemented emergency preparedness programmes across all production facilities — covering evacuation, fire suppression, and emergency response protocols

HSE Supervisor

Pak-Arab Oil Refinery Company (PARCO) | Oil Refinery Expansion & Modification Project | Pakistan

June 2004 – March 2011

HSE supervision across a 7-year oil refinery expansion and modification project — establishing the foundation of a 21-year zero-accident professional career.

- Implemented and maintained IMS Triple Certification (ISO 9001 / ISO 14001 / OHSAS 18001) across the full 7-year tenure
- Commissioned and operationally tested large-scale firefighting infrastructure including 8,000 GPM fire suppression systems
- Established the zero-incident culture and HSE management baseline that has underpinned 21 continuous years of accident-free operations
